Beamer for UIC presentations

A quick start

If you would like \LaTeX in your presentation, Beamer is a great way to go!

- Beamer has a detailed [user manual](#), but we will go over the most common features.
- This template is designed for a 16:9 aspect ratio, which is the default in PowerPoint and the most common amongst projectors.
- The most common of all slide types involve bulleted points, like these.

Beamer for UIC presentations

A quick start

If you would like \LaTeX in your presentation, Beamer is a great way to go!

- Beamer has a detailed [user manual](#), but we will go over the most common features.
- This template is designed for a 16:9 aspect ratio, which is the default in PowerPoint and the most common amongst projectors.
- The most common of all slide types involve bulleted points, like these.
 - Placing `\pause` after items will allow you to sequentially unroll points.
 - Changing `\begin{itemize}` to `\begin{itemize} [<+>]` achieves a similar effect, although `\pause` gives finer control on the unrolling.
